

Three golden threads in science

Caring for our planet

Knowledge about all living things and their habitats gained through the 'biology thread' that runs through the science curriculum from EYFS to Year 6.

Working scientifically

Explicit teaching of the disciplinary skills in the science curriculum and the use of these as part of scientific enquiry.

The purpose of Science

Understanding science through the role of scientists in our society. Learning about specific scientists, both historic and current, and with a focus on our local area.
